Significant Liquidity and High-Quality Securities Portfolio

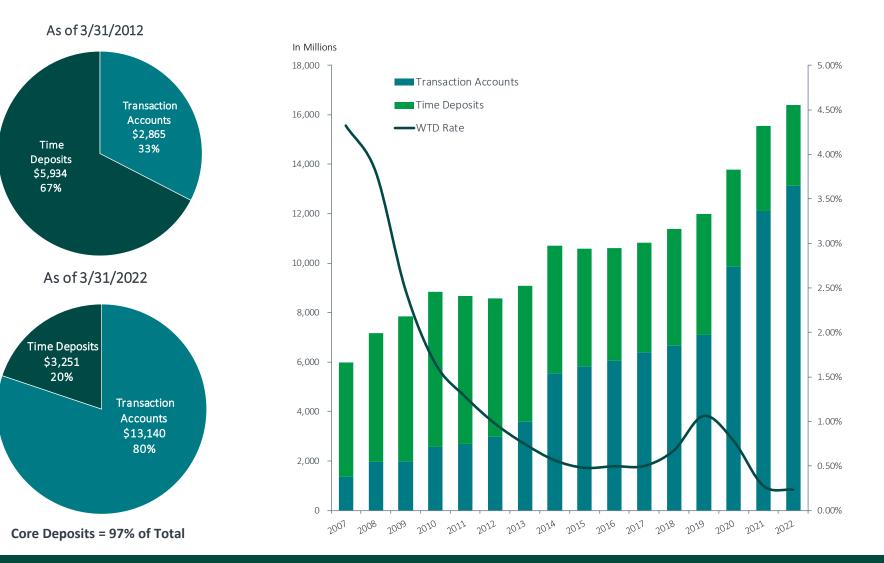

High quality, \$4.1 billion cash and investment portfolio with \$10.9 billion remaining collateral and lines as a source of additional potential liquidity

Deposit Trends

Shifting away from time deposits in favor of transaction accounts. Checking accounts now make up 44%.

WaFd Bank

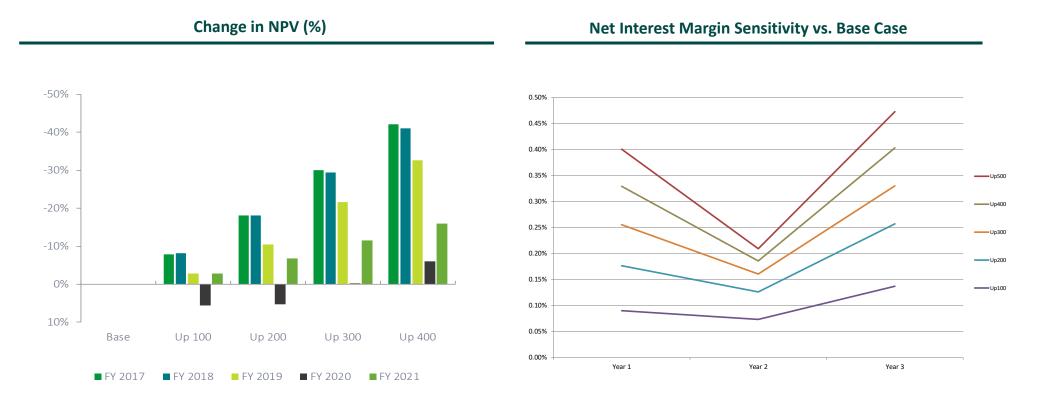

Borrowings Outstanding & Weighted Rate

Borrowings are 100% FHLB and are used in part to manage interest rate risk. Rates have declined with market rates. Increase in borrowings for 2020 was from locking in \$1 billion of funding at a fixed rate of 66 bps for 10 years. In 2021, strong growth in deposits allowed the Company to reduce FHLB borrowings.

Balanced Interest Rate Risk

Interest Rate Risk is well managed and skewed toward the upside in the current environment given asset sensitivity

IRR measures as of March 31, 2022:

- Net Interest Income (NII) would increase by 6% in +200 bps immediate and parallel shock
- Net Portfolio Value after +200bps shock is 25% lower (\$692mm) and at \$2.08 billion would be 11% of total assets

Scenarios assume no management actions taken. Flattening/inverted rates with short term up more than long term would result in a larger negative affect.
